For Halfmoon and HIOS Bits

Applications e.g. on smartphones, mobile phones, cameras, electronic equipment

Features a combination bitholder for both bits with Halfmoon and bits with HIOS drive.

Kraftform Micro handle

Multi-component screwdriver handle for ergonomic working.

The refined screwdriver for electronics technicians

The Kraftform Micro, with its three zones and their specific arrangement, satisfies these requirements perfectly. The free-turning cap that provides support for the hand works with these advantages, enabling quick and easy precision work.

The precision zone

The precision zone directly above the blade gives the user a better feel for the right rotation angle during fine adjustment work.

The power zone

The power zone has integrated soft zones near the blade tip to ensure high torque transfer for loosening or tightening screws without losing contact with the screw.

The fast-turning zone

The fast-turning zone just below the rotating cap allows rapid twisting.
